The Fund’s risk category describes the relationship between risk and reward and fluctuations in the Fund share’s performance. As the Fund does not have sufficient performance history data, the Fund’s risk category has been calculated using the Fund’s investment-strategy-based simulation over the past five years. The Fund’s current risk category is 3. Historical data may not be a reliable indication for the future.

The Fund’s risk category is based on a mathematical formula which does not take into account impairments, political risks or unpredictable fluctuations in interest rates or exchange rates. Even the lowest risk category (1) is not fully risk-free.

The category shown is not guaranteed and may shift over time. It is not possible to predict the risk and reward profile or future developments in the risk category based on the historical data of the Fund’s risk category. A complete description of risk factors is set out in the prospectus in the “Risk Factors Annex”.
